Kilroy Metal Products
383 Green Avenue
Brooklyn, New York

Attention: Mr. Frank Dolce

Dear Frank:

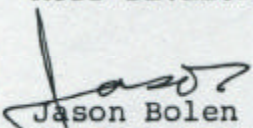

Rarely in this hectic business does one make the time to commend a sub-contractor for his efforts in construction of a new building. I would like to take that time, now, to thank you for the effort of your organization and you personally to coordinate and install window frames and sash in the Forest Hills Tower.

Like any other building there are many field conditions that had to be overcome and corrected. With your experience and willingness we were able to solve all problems and complete the installation of the windows on schedule.

Thank you again for your concern and effort.

Very truly yours,

MUSS DEVELOPMENT COMPANY

Jason Bolen
Project Manager
